

O'BRIEN COLLECTION, TRANCHE 6

Bids are invited for the following lots.

PRELIMINARY NOTES

1. Bids are the amount you will pay if successful (like a tender). Doing it otherwise is too difficult when bidding on certain items may be sparse.
2. P&P is to be paid by the bidder. A book typically costs about £2.80; there is a jump to £5.79 at the 2kg point. Collection from Harmston is of course free.
3. Items where bids fall short of the sum that the Committee believes can be obtained by an alternative route may be withdrawn from the sale.
4. Bids must be received by **15 Nov 2016** at the latest.

PART 1: NEW MAPS - ie not previously offered - (FOLDED)

UK (non-OS)

1. Thomas Kitchin, *A new improved map of Oxfordshire from the best Surveys and Intelligences*, c1:115k, [1751]. 21"x28". Two cartouches, the lower accompanied by a group of scholars engaged in earnest discussion. List of Oxford colleges and of seats of the Nobility, etc. Churches (most of them) are annotated as Rectory or Vicarage and the name of institutional patrons is given. Border and the boundaries of Hundreds have been coloured. There is an annotation in pen on one of the cartouches. Otherwise good condition. Dissected, in original slip-case.
2. Thomas Kitchin, *A new and accurate map of Warwickshire from the best Surveys and Intelligence*, c1:110k, [1746x59]. 21"x27". With views of Tamworth, Guys Cliff and Warwick Castle, historical notes and list of of seats of the Nobility, etc. Churches (most of them) are annotated as Rectory or Vicarage and a 'Garison' is shown at Birmingham. Boundaries of Hundreds have been coloured. Good condition. Dissected, in original slip-case. A copy is currently for sale at £275.

3. Thomas Jefferys, *The County of Oxford surveyed Anno MDCCLXVI&VII*, (above) 1:63,360, 1768. With a detailed plan of Oxford at c1:4.9k and a vignette of a lighter sailing past Oxford with a load of timber. Boundaries of Hundreds are coloured. Two sheets, 37"x25", dissected. Slight offsetting. Cloth is torn at a couple of the folds but map is otherwise sound and in nice condition. A copy is currently at auction with a guide price of £1880.

4. John Evans, *North Wales*, 1:190,080, 1797. Includes parts of England as far east as Chester and Shrewsbury. Extends as far south as Newtown. Nice vignette Conway castle with a ship. Dissected. Counties outlined in various colours. A few roads in vicinity of Bishop's Castle are coloured in the same magenta used for some of the counties. Has an ink stain in the sea off Anglesey; condition otherwise good.

5. J Cary, *A new map of Scotland*, 1:506,880, 1801. 41"x36". Insets for Shetlands and Orkneys. Parts of England and Ireland included in simplified form. Counties edged in various colours; roads in brown. Dissected in slip-case. Some offsetting, otherwise good condition.

6. J Cary, *A new map of the Principality of Wales, divided into Counties*, c1:323k, 1827. Counties variously tinted, roads brown, parks green. Dissected in original marbled slip-case, with owner's signature of ?1832. Some of the panels are parting from the backing cloth at the edges; exposure to damp has produced brown stains at one corner of each panel, typically affecting 3 sq in of each panel. Was purchased for

£40 in 1981.

7. Greenwood, *Map of the South East Circuit of the Principality of Wales comprising the Counties of Glamorgan, Brecon & Radnor*, c.1:86,400, 1828. Uncoloured. With excellent engraving of the ruined Llandaff Cathedral. The map is presented in 6 portions, each with a sewn border of green edging tape and dissected so as to fold to 10.5"x12.5", to fit loosely in a wooden case 12.5"x14.5" which is covered with marbled paper externally with a half-calf 'spine' and gilt title so that it can be shelved as a book. The map is in very good condition, with very slight foxing in places but no offsetting; the case has a split in the wood of the front cover (yet not such as to imperil it structurally or significantly to harm its appearance) and there is scuffing to the 'spine'. Described as "one of the rarest of the Greenwood large-scale maps". A similar (but coloured) specimen is currently being advertised at £750.

8. Robert Syar Hoggar, *City of Oxford*, 1:1584 (2 chains to inch), 1850. (above)
A very detailed plan, furnished with heights to 0.01 ft, evidently with sanitary use in mind. Those with a detailed knowledge of Oxford will be interested to see the Trill Mill stream open throughout and the City Gaol in the middle of Gloucester Green. Dissected, edged with blue tape, and provided with a rigid book-fold cover. An inscription reads: "Presented by the author, R Hoggar, to Dr Fred Wood, CE, Rugby". Some wear to spine, otherwise very good condition.

9. Bartholomew, *WH Smith & Son's New Plan of London*, c.1:20k, 1878 or 79. 32"x22" so covers inner suburbs only. Water blue, parks green, roads (if bus or tram

routes) brown, railways in black overprinted in magenta. These last are shown dashed when merely projected or under construction - eg completion of Inner Circle and the District's Putney Bridge branch. On cloth in stiff book-fold covers. The paper has worn at some of the folds but the cloth is sound and the map overall is in respectable condition.

10. *Bradshaw's Map of the Canals and Navigable Rivers of England and Wales*, 1:808k, c1905. Shows railways as well, with the Mid-Suffolk Light Railway and branches of the Kent & E Sussex dashed (?projected). Cloth, with green end-papers. Cloth has parted on a couple of the folds.

11. A Geikie, *Geological Map of England & Wales*, 1:633,600, 1897. Topography by John Bartholomew. Dissected in stiff book-fold covers. A 28-page booklet of Explanatory Notes is pasted inside front cover, whose paste-down folds over to protect it. vgc.

12. A Geikie, *Geological Map of Scotland*, 1:633,600, 1910. Topography by John Bartholomew. Dissected in stiff book-fold covers. A 31-page booklet of Explanatory Notes is pasted inside front cover. Map is in good condition; binding of Explanatory Notes is weak.

13. Sifton Praed / OS, *Map of the Country Round Berkhamstead*, 1:40k, [1916]. An enlargement of the 3rd edition one-inch with the addition of a Western Front type grid, "for the exclusive use of the Inns of Court Officers Training Corps". See Sheetlines 10, p6. Cloth with pasted linen covers.

14. Bartholomew, *Wincarnis Motor & Cyclist Map*, 1:633,600, c1920. 16 sections cover England & Wales. In red, blue & black. Robustly mounted on cloth, so that although the outer paper covers have almost completely gone, the maps themselves are still perfectly respectable.

15. William Rees, *South Wales and the Border in the Fourteenth Century*, (NW sheet and NE sheet) 1:126,720, printed by OS, 1932. Cloth, folded in brown card covers (EM). These covers are brittle and a small piece has almost been knocked that of the NE sheet. Maps themselves are in good condition.

16. Cornish's *Map of the Birmingham District*, 1:126,720. c1935. Bart's mapping "with special local revision and correction to date". 39"x31" so covers Leicester, Shrewsbury, Hereford. Dissected with grey pasted covers. Good condn.

17. Wirral Footpaths & Open Spaces Presn Soc, *Central Wirral, Cheshire*, 1:21,120, 1945. Covers Connah's Quay to Ellesmere Port to NW Chester. Reductions of latest

available OS 6" with additions of footpaths (red) and open spaces (green). However, the footpath map is ungridded, even though some of the sheets used (eg 38NE) carry the National Grid - and there is no sign that it has been cleaned off, Cloth in bookfold card covers. vgc.

OS

18. New Series, Sleet 270 South London, 1:63,360. Electrotpe taken 1879. Enough marginalia to show an epd of 1882. Dissected with marbled end-papers. vgc.

19. Revised New Series in Colour. Sheet 77, *Huddersfield*, 1:63,360. Print code 7.05 1.07. Cloth, in cream covers. As the specimen listed in Nicholson, except that this copy has cover information style 3. Some dirt and abrasion on the central fold (to the top when the map is shelved) , otherwise vgc.

20. Map of the Aldershot Command, 1920. 1:63,360. As in Cook & McIntosh Preliminary List, but mounted on cloth. Reverse bears stamp "9th BRIGADE // R.G.A."

21. Special District (Relief) Map, Birmingham District, 1:126, 720. Published 1933. Print code 10,000/34. With pencil date (purchase?) 21/9/44. Some acid-staining on edges of paper and at folds, but basically sound.

Covers from 35°30'N to 36°30'N, with detailed contours on land and such features as the Military Rly to Tetuan and the projected railway from Tangier to Fez. Dissected with Sifton Praed integral cover. The cloth is failing on some of the folds but not to any inconvenient extent.

Ethiopia

33. G Philip, The Daily Telegraph Map of Abyssinia, 1:4.125M, c1937. Countries coloured. In card covers, with native in fancy head-dress on horse. vgc.

France

34. Louis Capitaine & Pierre de Belleyne, *Carte de France comprenant la détermination de toutes les Municipalités*. 1:345,600, c1818. Sheets 7-12 (a west-east swathe across central France corresponding to one-quarter of the whole - for a key, see the large figures on http://www.cartocassini.org/cartecassini/france_NB.htm).

An 'official' reduction of the Cassini map, updated by Belleyme. Sheets are dissected with bookseller's¹ label on the reverse (Sheets 7 & 8 being mounted as a single sheet) and presented in a contemporary cardboard case, covered in green cloth (grained to look like calf) with title in gilt letters on maroon to go with books on a library shelf. The maps themselves are in good condition but the lower part of the case has lost its outer layer and bottom, so one sees bare cardboard. A complete set of all 24 sheets is currently being offered at £1764.

Gambia

35. War Office, *Military Report on the Colony and Protectorate of the Gambia, Vol II - Routes*, 1926. Detailed descriptions of roads and a couple of river routes, with notes like 'across a shallow swamp of 200 yds, dry in March'. In a pocket are two non-standard sheets of GSGS1958 (Africa, 1:250k) originally produced 1906 from the work of the Anglo-French boundary commission but revised 1925; between them they cover the whole country. In 5 colours, the maps show relief by form lines; much detail is conveyed by annotation, eg 'rice farms', 'mangrove swamps'. Detail is extended a few miles beyond the border of the Gambia. Condition: the maps have scarcely been used; they and the whole volume are wormed, but not so as to affect its usability.

Germany (pre-1945)

Preussische Landesaufnahme, Übersichtskarte von Mitteleuropa, 1:300k,

36. Sheet K50, Trier, 1925, printed 1926. A prominent orange national border symbol now separates off Alsace and Lorraine. Dissected, with Stanford label. Good condition.

37. Sheet M54, *Schwerin*, 1906, printed 1914. Includes Lüneberg, Lübeck, Parchim. Nicely drawn and printed - much better than the inter-war Übersichtskarten. Dissected and mounted on grey cloth; bookseller's label. vgc.

Versailles Treaty, 1919.

38. Map 3. *Danzig*. Base in grey transferred from Karte des Deutschen Reiches, 1:100k. In red are boundaries, solid or dashed according to whether they need to be delimited on the ground. 35"x26". Paper starting to tear at folds.

39. Map 4. *Schleswig*. Base in grey at 1:200k - not very legible and probably reduced. Key names overprinted in black. Red and orange lines show boundaries of plebiscite zones. Lithographed by Harrison & Sons, St Martin's Lane WC1. Starting to fail at intersection of folds.

¹ Picquet, Charles (1771-1827), Quai de Conti ou de la Monnaie, No 17. The address helps refine the date.

Germany (DDR)

40. VEB Road map 6, Leipzig, 1:200k, 1972. Not a bad topo map, with contour + hill-shading. Tri-lingual key: German, Russian, English. Marks 'transit roads' (the routes available for access from the West to west Berlin - the blocking of which was the occasion of the Berlin Airlift in 1948-9).
41. VEB, Wanderkarte 651, *Annaberg-Buchholz Marienberg*, 1:50k, 1966. A walking map without contours (just vague hill-shading) - but it does show a scattering of pubs.
42. VEB street plan 206, *Erfurt*, 1:12.5k, 1965. Good-quality town plan, with a 1:5k plan of the International Garden Exhibition on the reverse. Multi-lingual key: German, Russian, French & English. Some wear to folds.

72. C5530, *Suhl*, 1993. M.

73. Senatsverwaltung für Bauen, Wohnen und Verkehr, *Übersichtskarte von Berlin*, 1:50k, 1998. Despite its proud claim to be a 10-colour edition, an unimpressive piece of cartography.

Iceland

74. Landmælingar Íslands, 1:50k, Sheet 57 Hekla SV. Surveyed 1907, revised 1988, published 1989. Dates in different areas appear to mark the date of the lava on the surface. Areas tinted red perhaps indicate where the surface is hot.

Italy

75. W&AK Johnstone, *Travelling Map of North Italy* (cover). Inside is Keith Johnston, *North & Central Italy and the Island of Corsica*, 1:1.5M with environs of Rome inset at 1:253,440. This is from Johnston's Royal Atlas, started 1855, so shows Italy with a few early railways but before unification: a rare source for the administrative subdivisions of, say, the Papal States. Map is dissected and bound with an index in book-fold covers. Hinge weak, otherwise good.

² ie not the orohydrographic, the footpath, or the admin-boundaries versions.

76. Carlo Cerri, *Carta Stradale e Postale dell' Italia*, 1:864k, 1859. Published by Artari company of Vienna. 47"x31". This is just the northern sheet of a 2-sheet map, so outer border is on 3 sides only. The Papal States now have a railway, from Rome to Frascati. The hachuring makes for a very heavy look, and the map is much easier to use in the countries outside Italy which are not hachured but have good detail, notably Bosnia (W of Serajevo), Croatia & Dalmatia. Dissected in marbled slip-case. Good condition.

77. Sir William Gell, *Rome and its Environs*, c1:100k, 1834. Nicely engraved, from a trigonometrical survey. Sundry notes in Latin, eg 'Regio non satis explorata'. The area of Rome itself is coloured red, water is edged in a delicate blue. There is an image at <https://www.rc.umd.edu/gallery/rome-its-environs-trigonometrical-survey> Dissected. vgc.

78. IGM 1:100k, Sheet 102, *San Remo* (1895 edition 'senza opere militare'). Hachured and contoured, produced by 'Fotoincisione sistema Avet.', seemingly an engraved map but one where the plate is produced from a drawing without the employment of engravers. Includes part of France, which is drawn with lighter hachures and without contours. Dissected with small label on reverse.

79. IGM, 1:50k, Sheet 029 Cortina d'Ampezzo = M792, NL33-4-c1, 1968. Hill-shaded. Excellent cartography.

Touring Club Italiano, *Carta delle Zone Turistiche d'Italia*, 1:50k. Nice hill-shaded mapping, drawn from IGM and other sources. In pouch.

80. Sheet 14, *Adamello*, ?1962

81. Sheet 15, *Gruppo di Brenta*, ?1962

83. *Pianta Topografica di Roma Moderna estratta dalla grande del Nolli an 1843*. 1:8k. Insets show plans of St Paul, Santa Costanza and San Lorenzo fuori le mure. It is remarkable to see that buildings cover only half the area within the walls; the Colosseum is surrounded by gardens. 33"x25". Dissected, with backing cloth turned over and sewn at edges to provide a guard. Some of the panels are curling up just a little at the edges and the paper has taken on a slightly yellow-brown tint but basically good condition. A New York dealer is offering the 1847 edition in similar condition at \$495.

84. Michelin 988, *Italie, Suisse: Grandes Routes*, 1974. Good condn.

Madeira

85. Fairey Leisure Map, 1:70k. c1975. Insets cover Porto Santo and (at 1:10k) Funchal.

86. IGC, 1:50k, *Ilho da Madeira*, surveyed 1915, revised 1958. 2 sheets designed to be mounted together: the border runs round 3 sides of each. Overall map is thus 49"x26" between neat lines. Some wear at junctions of folds.

87. IGC 1:50k, *Ilha do Porto Santo*, 1970. Nice mapping, derived from 1:2k cadastral plans.

Portugal

88. IGC 1:400k, 1957-8. 3 sheets covering whole country. Minimal detail of Spain: main roads and railways but no contours.

IGC 1:50k. (M7810). 5-colour, dominated by red detail.

89. Sheet 5A Viano do Castelo, 1963. Starting to fail at folds.

A sheet of this atlas is illustrated in IMCOS Jnl 145 (2016) p22, which will indicate the style. This sheet, 42"x30", is the western of two sheets intended to be mounted together, so only half the title appears, etc. Dissected, with cloth endpapers. Library stamp.

UK

129. J Cary, *Survey of the High Roads from London*, 1:63,360, 1790. This could have been more accurately entitled 'High Roads *around* London' as it extends out to only about 30 miles but includes almost all radial routes. A tipped-in General Map at the start indicates which plates one should refer to for any place within this area. A second map explains the different turnpike trust jurisdictions. The individual strip maps are remarkable for the number of gentlemen's residences they show (with names of proprietors): for example, 27 in Twickenham and Teddington. 6"x9". Bound in calf with gilt title on maroon. Some offsetting; otherwise vgc.

130. J Cary, *Traveller's Companion*, 1791(title page) / 1792(maps inside). A compendium of small (4"x6") maps of English counties. Wales is covered in two such maps. 147. Programme. Official opening of the new headquarters building at Southampton, 1 May 1969. Stiff covers, 12pp. 6 b/w photographs include a drawing office and printing shop, not to mention a boring shot of the main conference room!

PART 4: CARTOGRAPHIC BOOKS

149. R H Phillimore, *Historical Records of the Survey of India, Vol I to IV*; (Svy of India, 1945-58). Qto Hbk. Notwithstanding the title, this is a massive history of the Survey, not a description of its records. Each volume has a 15-20 plates, some tipped in, some with colour. All volumes have a final section with biographical notes on the surveyors active in that period. A fifth volume was planned but does not seem to have been produced. Withdrawn from DOS library.

Vol I covers the C18, Vol II, 1800-1, Vol III 1815 to 1830, Vol IV 1830-43. The binding of Vol II is a little weak; Vol III is bumped; otherwise these are in good condn.

150. KM Clayton (ed), *Guide to London Excursions* (20th International Geographical Congress, London, 1964). This is actually a collection of 42 shortish papers produced to brief participants on excursions. Visits included Ordnance Survey (paper has full-page Old Series and modern Tourist extracts), Hydrographic Dept, Hunting Surveys, Geo Philip and the Bodleian Map Room. 153. Hal Empson, *Mapping Hong Kong*, 1992. A 79-page introduction, with parallel Chinese and English text and thumbnail images is followed by 149pp of reproductions, of large format (book is 12"x17") and good print quality. Coverage extends from earliest maps to the 1990s and includes nautical charts, geological maps and air photographs. For the larger-scale modern maps space allows only a sample, but an attempt has been made to include all series.

154. W P Cumming, *British Maps of Colonial America*, (Univ of Chicago Press, 1974). Hbk, 114pp. 34 figures in monochrome. Originated in a series of lectures given in 1970.

It is arranged in 'families' and the wide re-use of the material leads to the listing of products like WW2 1:500k aviation maps, or certain Russian atlases. Intelligently illustrated in colour - photos are used to make a point. A work to browse, as well as being an essential reference. Hbk, 1371pp.

PART 5: GUIDES

Other

163. Homeland Handbook 30. *Littlehampton, Arundel and Amberley*, 1927. 170. C Middleton, *3-D City Guides: Munich*, 1993. Mostly taken up by good-quality sketches from an oblique viewpoint. Good to see how eg the Asamkirche fits in with buildings around it on its congested site. 143pp, glossy covers.

171. Ivan Boldiszar, *Hungary*, (Corvina Press, 1969). Hbk, 384pp, no dust jacket.

172. Antall Papp, *Hungary*, (Corvina Press, 1971) 350pp, leatherette-plastic covers.

173. GH Ebtehaj, *Guide Book on Iran*, 2nd edn [1935, on basis of dated car advert]. Main part of guide is organised as Routes, with notes like 'A good deal of opium and cotton are exported from here', 'The scarcity of water is very acute. RAILWAY

178. *Furka-Oberalp Bahn, Schweiz*. 1931. A charming little guide to the rack railway from Brig to Disentis, with map, gradient profile with photographs of views one might see on one's journey and a couple of shots of trains (still steam-hauled). In German. 32pp in card covers with *moderne* graphic design.

PART 6: ITEMS PREVIOUSLY LISTED

OSI

179. 1:250k *Ireland, South, Holiday Map*. One of a layered 4-sheet series covering whole island. Despite the title, this is pukka 1:250k cartography.

GSGS

180. GSGS2555 Asia 1:1M. Sheet North K 36 (Sinob - N central Turkey) 1916. Dissected in Sifton Praed covers.

181. GSGS2733 NW Europe, 1:250k. Sheet 1 and part of 4, Revised edition, Feb 1915. Key for roads distinguishes 'main, macadamised' from 'main, paved' (ie pavées). An interesting map: one is struck by the amazing double ring of forts around Antwerp and by the direct railway line from Bruges to Brussels (S) being shown as under construction E of Aalst. This is the sheet that started life as GSGS2733b - see Sheetlines 39, p34. Cloth, direct-printed cover.

181. GSGS2738 France 1:250k. Sheet 1A, September 1917. This is the version John Cruickshank describes (Sheetlines 39, p34) where he notes that it includes England S & E of London, specially drawn at 1:250k. More important for its intended users, it has been redrawn in the style of GSGS2733 (except that the pavé symbol has been dropped (presumably the information was not available); the sheetlines are aligned with those of 2733. The style used for the English detail is based on that used in France but the detail is not so fine.

182. GSGS2758 Europe 1:1M. Sheet North L 33 (Triest). Drawn & printed by OS 1915, railways to 10.4.19, international boundaries to 1926. Dissected in Sifton Praed marbled covers.

183. GSGS 4338, Ireland (LSS), Sh 7 Cork & Kerry, 1st edn Ground/Air, 1942. With 'Sales Copy' stamp, on cloth, and provided (by purchaser) with a card book-fold cover.

Michelin

184. Sheet 152, Sahara, 1:4M, 1958. Has much unusual information, such as whether there are Europeans in a settlement, whether aviation fuel can be obtained, etc.

185. Sheet 175, Ivory Coast, 1:800k, 1978. With climate table (principally to show

wet/dry seasons).

Belgium

186. IGM 1:250k, 1964. Double-sided, covering whole country, with Luxemburg and adjoining parts of Fr, Ge, NL. Direct-printed cover.

187. IGN 1:100k Sh 116 *Esneux - St Vith*, 1988. The normal topographic map is on one side. On the reverse is a version in grey outline with overprints showing recommended tours by car, long-distance footpaths, interesting churches. Oddly, names of ex-communes appear in red on this version. As new.

Brazil

188. American Geographical Society of New York, South America 1:1M, sheet S D-22 (Goyaz), 1935. Provisional edition (of IMW?). The reliability diagram is frightening: a very few 'reliable traverses' with much of the map filled in from descriptive notes. It comes as a shock to discover that Brasilia is just about at the SE corner of the map.

Cameroun

189. IGN, Sheet NC-33/34 -N.O. (Maroua), 1:500k, 1st edn, Sep 1964. Adjoining countries shown in outline only. In card wallet. Worn at folds. Annotated in biro with approx boundaries of some ?estates.

Finland

Maanmittaushallitus, 1:200k Motoring map. With insets of towns, about as coarse as those on OS 4th edn quarter-inch. Multi-lingual legend.

195. Sh 4 , centred on Tampere, 1965.

196. Sh 5, centred on Mikkeli, 1966.

France

198. IGN, *Lille et son agglomeration*, 1:13k, 2000. A large and detailed 2-sided street plan that folds out from the back of a 64p booklet with index to streets etc. The stiff front cover of the booklet folds out to provide a useful plan of the city centre. The main plan appears so unsuited for actual use that this may well be a rare specimen in near-pristine condition.

Hong Kong

199. Hong Kong Govt, *Hong Kong, Kowloon and the New Territories*, 1:50k, Revised to 1978. In 2 sheets. No covers. No detail within mainland China.

Reproductions

236. Humphrey Lhuyd, *Cambriae Typus*, [c1650], 1:675k. Monochrome reproduction of 1971, 19"x14", part of an exhibition catalogue. W boundary of Wales is taken as the Rivers Severn and Dee, so includes eg Tewkesbury. Many place names are given in Latin, Welsh and English.

237. P Pfinzing, *Umgebung der Stadt N rnberg*, c1596. 13"x12", printed in full colour plus silver & gold. Well-suited for framing. The map is most interesting, being somewhat skeletal in its depiction of the area within the walls but the suburbs and adjoining villages are treated in remarkable detail with land-use, mills, churches, buildings and a depiction of fences and hedges that seems to be exact.
